EXPERIENCE

EXL SERVICE (GLOBAL DATA ANALYTICS AND DIGITAL SOLUTIONS FIRM OF \$2.0B REVENUE)

Noida (remote), India

Senior Manager

Oct 2024– Present

Manager

Jul 2021 – Sep 2024

Product and Technology:

- Created and executed a 12-month roadmap for Gen AI adoption in EXL's Healthcare solutions. Identified and evaluated the market potential of 6 POCs and successfully advanced four of these to MVPs
- Generated ~\$17 M revenue across 4 client projects by cross-functional collaboration with multiple development, security, compliance & SME teams, driving project prioritization & stakeholder communications on timelines, progress, and risks
- Managed 2 agile teams (7-member teams), responsible for gathering and prioritizing product/feature requirements, defining product vision, and delivering MVPs that showcased GAI-powered applications for process efficiency and cost reduction
- Improved sprint velocity 35% by implementing AI assistants (GitHub Copilot, Claude Code, Nemoclaw) and designed onboarding sessions and hands-on training for AI-augmented coding best practices into development workflows
- Designed and implemented Python-based agent evals across accuracy, completeness, policy adherence, clinical relevance, reasoning, and automated test harness execution on 100+ synthetic scenarios, enabling iterative agent tuning across sprint cycles
- Accelerated build cycles by 21% by spearheading an architecture guild (6+ architects) to improve developer productivity through reusable components, standardized LLM integration patterns, and eliminating redundant development across 4 product lines
- Achieved a 28% reduction in annual cloud costs (~\$64K saved) for the R&D team within 3-months through optimized compute usage, improved availability, and virtual machine auto-shutdown pipelines

Strategy:

- Published 12+ editions of monthly newspaper reports, curating articles on industry research and trends, and developments in current business to prompt opportunity identification
- Managed 6 Healthcare conferences from messaging to professional outreach and networking opportunities for VP+ leaders

Operations:

- Improved DSO from 94 to 85 by reviewing outstanding client invoices & supporting payment collection through AMCE and implementing ACH systems for easy reconciliation
- Ensured appropriate resource alignment & cost allocation in projects; Reviewed project cost codes and closed ~400 inactive codes

PRIONE BUSINESS SERVICES LTD. (AMAZON SUBSIDIARY ENABLING SMBs)

Bangalore (remote), India

Management Intern - Sales

May 2020 – Jul 2020

- Analyzed over 11,000 existing seller launches; identified parameters for evaluating sellers and developed the CAN framework to capture seller potential; 90% accuracy achieved
- Identified 500+ HV/Brand Priority leads from the CAN model; 200+ HV/Brand sellers launched with an average GMS of 120K; TAT improved ~20% for HV/Brand sellers; ~17% increase in Sales associate productivity

SAI LIFE SCIENCES LTD. (MULTINATIONAL CRMO COMPANY OF \$105M REVENUE)

Hyderabad, India

Process Engineer

Jul 2018 – Jun 2019

- Developed process from lab to pilot and manufacturing scale, achieving 25 & 60-fold scale; 1 of 2 team members responsible for delivering 2 API intermediary products of 3.5 M.T worth ~\$ 35 Mn

EDUCATION

INDIAN INSTITUTE OF MANAGEMENT CALCUTTA (IIMC)

Kolkata, India

M.B.A, General Management

Jun 2019 – May 2021

- CAT: 99.69 percentile (out of 2.1L candidates); Created an algorithm based on past data & identified 130 high-demand products, and developed a subscription model for 1-day delivery across 21 cities for Udaan, a logistics company
- Designed a case on MG Motors entry in the Indian SUV market; Brand strategy to navigate the future; Received A+ for term paper

NATIONAL INSTITUTE OF TECHNOLOGY SURATHKAL (NITK)

Surathkal, India

B. Tech, Chemical Engineering

Aug 2014 – May 2018

- Awarded INR 1.44 Lakh through IOCL's Educational scholarship among 300 students for 4 years of B.Tech
-

SKILLS

- **Technical skills:** PM tools (JIRA, Azure DevOps, product roadmaps, PRDs, MS Office Suite), AI infra (Azure, GCP, Databricks), GenAI (Python, chatbots, fine-tuning, agents, prompt engineering, evals), productivity tools (Cursor, GitHub Copilot)
- **Certifications:** PMP®, CSPO®, Agile Scrum, Generative AI (from 100x Engineers), AWS CCP, Ian Golding Customer experience framework, Lean Six Sigma Green Belt
- **Personal projects:** (<https://github.com/sathviksriss7>)
 - Developed an AI-powered CRM for managing sales pipeline and related customer interactions (~60,000 LOC), demonstrating end-to-end software development and GAI application skills
 - Selected as a semifinalist in the 100x Engineers Buildathon 2.0 for creating an AI-powered influencer management platform that finds influencers across social media channels, manages outreach, streamlines processes, and reduces overhead costs for brands
